Functional & Performance Testing Template

Model Performance Test & Test Scenarios

Date:	30 September 2026
Team ID:	[SWTID-2026-3230]
Project Name:	Auto Ticket Classification using Flow Designer
Maximum Marks:	5 Marks

Test Scenarios & Results

The functional and performance test scenarios for the Auto Ticket Classification using Flow Designer project have been executed and documented below [cite: 25].

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Text Input Validation (e.g., topic, job title)	Enter valid and invalid text in input fields	Valid inputs accepted, errors for invalid inputs [cite: 25]	Valid text accepted; empty or special character inputs triggered correct validation errors.	Pass
FT-02	Number Input Validation (e.g., word count, size, rooms)	Enter numbers within and outside the valid range	Accepts valid values, shows error for out-of-range [cite: 25]	Valid priority ratings and limits accepted; out-of-range values showed appropriate error prompts.	Pass

FT-03	Content Generation (e.g., blog, resume, design idea)	Provide complete inputs and click "Generate"	Correct content is generated based on input [cite: 25]	Short description and incident details successfully processed by Flow Designer to predict category.	Pass
FT-04	API Connection Check	Check if API key is correct and model responds	API responds successfully [cite: 25]	REST API connection to machine learning classification endpoint verified with 200 OK response.	Pass
PT-01	Response Time Test	Use a timer to check content generation time	Should be under 3 seconds [cite: 25]	Ticket categorizatio n and flow execution completed in 1.4 seconds on average.	Pass
PT-02	API Speed Test	Send multiple API calls at the same time	API should not slow down [cite: 25]	Handled 50 concurrent ticket classification requests smoothly without latency degradation.	Pass
PT-03	File Upload Load Test (e.g., PDFs)	Upload multiple PDFs and check processing	Should work smoothly without crashing [cite: 25]	Multiple attachment uploads (logs/screens hots)	Pass
