Project Design Phase: Sprint Planning & Velocity Estimation

Date:	30 September2026
Team ID:	[SWTID-2026-3230]
Project Name:	Auto Ticket Classification using Flow Designer
Maximum Marks:	4 Marks

Sprint Planning & Agile Definitions

A Sprint is a fixed period or duration in which a team works to complete a set of tasks [cite: 26]. An Epic is a big task or project too large to complete in one sprint, broken down into smaller tasks (stories) across multiple sprints [cite: 26]. A Story is a small task that is part of an Epic [cite: 26]. A Story Point represents effort using the Fibonacci series (1, 2, 3, 5), where 1 = Very Easy, 2 = Normal, 3 = Moderate, and 5 = Difficult [cite: 26].

Sprint 1: Core Setup & Ticket Intake

Epic / Module	User Story / Sub-Task ID & Description	Story Points
ServiceNow Instance Setup (Epic 1)	Instance provisioning & developer environment setup (USN1)	2
ServiceNow Instance Setup (Epic 1)	Role-Based Access Control (RBAC) & user roles configuration (USN2)	2
Service Portal & Form (Epic 2)	Design support portal UI layout for students and faculty (USN3)	2
Service Portal & Form (Epic 2)	Add Short Description and Detailed Description input fields (USN4)	1
Service Portal & Form (Epic 2)	Configure attachment upload functionality for screenshots and logs (USN5)	3

Total Story Points in Sprint 1 = 2 + 2 + 2 + 1 + 3 = 10 [cite: 26]

Sprint 2: Automation Flow & Smart Routing

Epic / Module	User Story / Sub-Task ID & Description	Story Points
Flow Designer Workflow (Epic 3)	Trigger configuration on new incident record creation (USN6)	2
Flow Designer Workflow (Epic 3)	Keyword extraction & pattern parsing script (Regex / JavaScript) (USN7)	5
Flow Designer Workflow (Epic 3)	Category, subcategory, and priority decision tables setup (USN8)	3
Assignment & Dashboard (Epic 4)	Dynamic assignment group routing logic (Network, Hardware, Software) (USN9)	3
Assignment & Dashboard (Epic 4)	Email notification template and trigger configuration (USN10)	2
Assignment & Dashboard (Epic 4)	Support agent executive dashboard configuration (USN11)	5

Total Story Points in Sprint 2 = 2 + 5 + 3 + 3 + 2 + 5 = 20 [cite: 26]

Team Velocity Calculation

Total Story Points = Sprint 1 (10) + Sprint 2 (20) = 30 [cite: 26]
Number of Sprints = 2 [cite: 26]
Velocity = Total Story Points Completed / Number of Sprints [cite: 26]
Velocity = 30 / 2 = 15 Story Points per Sprint [cite: 26]
